

Social Responsibility: Contributing to the Community and Caring for the Environment

Students develop awareness and take responsibility for their social, physical, and natural environments by working independently and collaboratively for the benefit of others, communities, and the environment.

With some support, I can be part of a group. I can participate in classroom and group activities to improve the classroom, school, community, or natural world. I can contribute to group activities that make my classroom, school, community or natural world a better place. I can identify how my actions and the actions of others affect my community and the natural environment and can work to make positive change. I can analyze complex social or environmental issues from multiple perspectives. I can take thoughtful actions to influence positive, sustainable change.

	Eaglet's World by Evelyn White Minshull. 2014	Environmental issues that effect eagles.
	Red Parka Mary by Peter Eyvindson	Caring for individuals in the community
